Education

Bachelor of Cybersecurity

Deakin University

2024 - 2026

Diploma in Information Technology

Deakin University

2023 - 2024

Certificate in Data Analytics & Visualization in Python

Deakin University

2022 - 2023

Leadership Certificate, Deputy President, Coding Club Founder

Juja Senior School

2019 - 2022

Language

English - Fluent

Kiswahili - Fluent

Ethical Hacker | Help-desk Tech Support |

Summary

My biggest driver in life has always been the pursuit of the unknown. At 16, I taught myself Caesar Cipher Codes to secretly communicate with my deskmate. At 18, I moved across the globe alone to see what it would take to build a life from zero. At 19, that same curiosity led me to land a sales role selling Ferraris.

This constant pursuit of challenge and curiosity is what ultimately led me down the path of becoming an Ethical Hacker.

Experience

Cyber Business Development Associate

Cylynk - Contract

JAN
2025
-
DEC
2025

- 1. Reduced cybersecurity incidents by 35% by actively monitoring security alerts (SIEM, EDR, firewall logs), identifying suspicious behavior early, and stopping threats before they impacted the business.
- 2. Improved incident response speed by 40% by investigating security incidents, containing attacks, and clearly explaining risks and actions to both technical and non-technical teams.
- 3. Lowered security risk by 30% by performing vulnerability assessments, prioritizing critical weaknesses, and working with IT teams to ensure issues were fixed and verified.
- 4. Increased threat detection accuracy by 25% by tuning SIEM rules, reducing false positives, and applying threat intelligence to better identify real attacks instead of noise.
- 5. Achieved 100% audit and compliance readiness by supporting security policies, documentation, and controls aligned with frameworks like NIST and ISO 27001.
- 6. Prevented data breaches and user compromise by promoting security best practices, supporting phishing awareness efforts, and helping non-technical teams understand how their actions affect security.

Skills

Cybersecurity & Technical

- Ethical Hacking
- OSINT: Open Source Intelligence
- Penetration Testing
- Digital Forensics
- Network Security
- Python Programming
- Security Compliance
- Web Development
- Database Management
- Risk Analysis
- Data Visualizations
- Network Monitoring
- Security protocols
- AI Automation
- RAG Databases
- Large Language Models
- SIEM Systems
- Troubleshooting
- Incident Response

Soft Skills

- Emotional Intelligence
- Team Collaboration
- Leadership
- Adaptability
- Attention to Detail
- Communication

Ethical Hacker | Seeking Network Engineering Or SOC Tier 1 Roles

Experience

SEP
2024
-
DEC
2024

Cybersecurity Volunteer

Hck4G - Part-Time

- 1. Delivered cybersecurity awareness education to undeserved communities by creating simple, easy-to-understand training on phishing, password safety, and online privacy.
- 2. Designed and ran security awareness campaigns that helped non-technical users recognize common cyber threats such as scams, social engineering, and account compromise.
- 3. Translated complex cybersecurity concepts into plain language so individuals, volunteers, and small organizations could understand how to stay safe online.
- 4. Supported phishing awareness and safe-email practices by demonstrating real-world attack examples and teaching users how to spot and report suspicious messages.
- 5. Collaborated with volunteers, educators, and partner organizations to embed basic cybersecurity best practices into daily operations and digital programs.
- 6. Measured and improved awareness impact by gathering feedback, tracking participation, and refining training materials to increase engagement and real-world behavior change.
